| Remark   | 903  | The member's plan covers services or supplies needed (medically necessary) to treat a disease or injury. To determine whether future claims meet this requirement of the member's plan, we may request additional information from you. Future claims for this type of service may not be covered if this requirement is not met. A medical necessity determination based on the specific plan of benefits and medical records will be conducted at a specified point in time during the course of therapy for physical & occupational therapy, acupuncture, osteopathic therapy and chiropractic treatment. Depending on the member's plan of benefits, the review may occur following the 10th and 25th visit. Claims for therapy services may be subject to medical review, even if the plan has unlimited benefits, and even if the services are provided by a participating provider. Coverage of benefits is dependent upon the timely submission of records. [ICTR - 903] <a href="#">Show less...</a> |
